Investment Adviser

Capital Growth Management
Limited Partnership

To Our Shareholders:

CGM Focus Fund declined -19.3% during the second quarter of 2010 while the Standard and Poor's 500 Index lost -11.4%. Year-to-date through June 30, 2010, CGM Focus Fund fell -16.7% while the Standard and Poor's 500 Index lost -6.7%.

The first quarter of 2010 ended on a hopeful note. New home sales surged 12.1% from February to March to a seasonally adjusted level of 389,000, and sales of existing homes jumped a full 7.0%. Chain store sales in March were up 9% year-over-year fueled in part by an early Easter. The recovery continued into April with new home sales up an additional 14.7% from March stimulated by demand ahead of a tax credit set to expire at the end of the month. In April, the Consumer Confidence Index rose to 57.7 from 52.3 a month earlier. Signs of economic vigor helped propel the equity market to a new high for 2010 on April 23 when the S&P 500 closed at 1,217.28, up 9.2% since the end of 2009. This proved to be the high for the quarter both in terms of market performance and economic news on many fronts.

April unemployment numbers, which were released in May, increased to 9.9% from 9.7% the month before while weekly unemployment claims failed to decline significantly. Retail sales in April (same store sales results, also released in May) lost steam, rising only 0.8%. Inflation came to a virtual halt with the Consumer Price Index up only 0.9% in April from one year earlier. Real Gross Domestic Product growth numbers for the first quarter were revised downwards from 3.2%, eventually to 2.7%, and existing home sales declined 2.2% in May. (Later we learned that new home sales plummeted 32.7% in May to record lows.) However, financial conditions deteriorated far more dramatically in Europe and in early May, turmoil erupted in Greece when public employees took to the streets to violently protest budget cutbacks imposed by the government in an effort to shore up the country's finances. Over the weekend of May 8, the European Central Bank agreed to help stabilize the Euro by purchasing debt of some of the more troubled members of the European Union. On Monday, May 10, U.S. investors signaled their approval of the move and the S&P 500 rose 4.4% to 1,159.73 that day, its largest jump in more than a year. However, the enthusiasm was short lived. The U.S. stock market resumed its downward track and

the S&P 500 suffered its worst decline during the month of May since 1962.

During the second quarter of 2010, much of the bad economic news (and underlying slowdown in the U.S. recovery) has emanated from the housing market and retail sales. The Consumer Confidence Index managed to hold up for most of the quarter and rose to 62.7 in May, its highest level since September 2008. However, in June it retreated sharply to 52.9, only slightly above March 2010 levels. Nonetheless, U.S. manufacturing remained strong as indicated by the Institute of Supply Management's Purchasing Managers' Index (PMI) which was 59.7 in May, down slightly from 60.4 in April, but, for the tenth consecutive month, still well above 50 which generally indicates an expansion of the overall economy.

Thomson Reuters forecasts earnings per share for the S&P 500 Index could be \$85 this year, up from \$56.80 in 2009, which translates into a price-to-earnings ratio of 12 times, lower than the long-term average of 15. Yields on long- and short-term bonds alike are, in our view, extraordinarily low, leading us to believe current market levels already reflect much of the disappointing business news. Admittedly, part of the decline in the 10-year U.S. Treasury Bond yield from 4% in early April to 2.95% in late June can be attributed to a "flight to safety" spurred by the European debt crisis. Indeed, the European situation, pending financial reform legislation and ramifications of the Gulf oil spill have all adversely affected market prices. That said, should companies report strong earnings in July, we believe current U.S. equity market prices could prove to be very attractive.

On June 30, CGM Focus Fund's three largest positions were in the auto and related, electronic components and heavy capital goods industries. The Fund's three largest holdings were Ford Motor Company, SanDisk Corporation (electronic components) and Apple Inc.

CGM FOCUS FUND

INVESTMENT PERFORMANCE

(unaudited)

Total Return for Periods Ended June 30, 2010

	The Fund's Cumulative Total Return	The Fund's Average Annual Total Return
10 Years.	+304.5%	+15.0%
5 Years.	+ 8.1	+ 1.6
1 Year.	- 1.7	- 1.7
3 Months	- 19.3	—

The performance data contained in the report represent past performance, which is no guarantee of future results. The table above does not reflect the deduction of taxes a shareholder would pay on Fund distributions or the redemption of Fund shares and assumes the reinvestment of all Fund distributions. The investment return and the principal value of an investment in the Fund will fluctuate so that investors' shares, when redeemed, may be worth more or less than their original cost. Current performance may be higher or lower than the performance data quoted.

The adviser limited the Fund's total operating expenses to 1.20% of its average net assets exclusive of any dividend expense incurred on short sales through December 31, 2001. Otherwise, the Fund's cumulative total return and average annual total return for the ten year period would have been lower.

Portfolio turnover (%)	389 *	464	504(d)	384	333	282
Net assets at end of period (in thousands) (\$)	2,665,276	3,640,297	4,178,899	5,536,114	2,272,039	1,641,143

(a) Net investment income (loss) per share excluding all related short sale income and expenses (\$) (0.05) 0.03 0.32 (0.02) 0.36 0.23

(b) Per share net investment income (loss) has been calculated using the average shares outstanding during the period.

(c) In 2006, the Fund's total return includes a voluntary reimbursement by the adviser for a realized investment loss. Excluding this item, the total return would have been 0.01% less.

(d) Portfolio turnover excludes the impact of assets resulting from a merger with the CGM Capital Development Fund on June 20, 2008.

* Computed on an annualized basis

See accompanying notes to financial statements.

CGM FOCUS FUND

NOTES TO FINANCIAL STATEMENTS — June 30, 2010

(unaudited)

1. Organization — The Fund is a non-diversified series of CGM Trust which is organized as a Massachusetts business trust under the laws of Massachusetts pursuant to an Agreement and Declaration of Trust. The Trust is registered under the Investment Company Act of 1940 as an open-end management investment company. The Trust has two other funds whose financial statements are not presented herein. The Fund commenced operations on September 3, 1997. The Fund's investment objective is long-term growth of capital. The Fund intends to pursue its objective by investing in a smaller number of companies, and/or in a more limited number of sectors than diversified mutual funds. In addition, should the investment outlook of the Fund's investment manager so warrant, the Fund may engage in a variety of investment techniques including short sales designed to capitalize on declines in the market price of specific equity securities of one or more companies or declines in market indexes.

The following is a summary of significant accounting policies consistently followed by the Fund in the preparation of its financial statements. The preparation of financial statements in accordance with accounting principles generally accepted in the United States of America requires management to make estimates and assumptions that affect the reported amounts and disclosures in the financial statements. Actual results could differ from those estimates.

2. Significant accounting policies — Management has evaluated the events and transactions from June 30, 2010 through the date of issuance of the Fund's financial statements. For the Fund, there were no material subsequent events that required disclosure in the financial statements or footnotes.

A. Security valuation — Equity securities are valued on the basis of valuations furnished by a pricing service, authorized by the Board of Trustees. Equity securities listed or regularly traded on a securities exchange or in the over-the-counter ("OTC") market are valued at the last quoted sale price or, for certain markets, the official closing price at the time the valuations are made. A security that is listed or traded on more than one exchange is valued at the quotation on the exchange determined to be the primary market for such security. For securities with no sale reported, the last reported bid price is used for long positions and the last reported ask price for short positions. Short-term investments having a maturity of sixty days or less are stated at amortized cost, which approximates value.

When current market prices or quotations are not readily available or do not accurately reflect fair value, valuations may be determined in accordance with procedures adopted by the Board of Trustees. For example, when developments occur between the close of a market and the close of the NYSE that may materially affect the value of some or all the securities, or when trading in a security is halted, these procedures may be used. The frequency with which these procedures are used is unpredictable. These valuation procedures may result in a change to a particular security's assigned level within the fair value hierarchy described below. The value of securities used for Net Asset Value ("NAV") calculation under these procedures may differ from published prices for the same securities.

The Fund may use valuation techniques consistent with the market, income, and cost approach to measure fair value. The market approach uses prices and other relevant information generated by market transactions involving identical or comparable assets or liabilities. The income approach uses valuation techniques to convert future amounts (cash flows, earnings) to a single present amount. The cost approach is based on the amount that currently would be required to replace the service capacity of an

CGM FOCUS FUND

NOTES TO FINANCIAL STATEMENTS (continued)

(unaudited)

asset. To increase consistency and comparability in fair value measurements and related disclosure, the Fund utilizes a fair value hierarchy which prioritizes the various inputs to valuation techniques used to measure fair value into three broad levels:

- Level 1 – Prices determined using: quoted prices in active markets for identical securities.
- Level 2 – Prices determined using: other significant observable inputs (including quoted prices for similar securities, interest rates, prepayment spreads, credit risk, etc.).
- Level 3 – Prices determined using: significant unobservable inputs. In situations where quoted prices or observable inputs are unavailable, (for example, when there is little or no market activity for an investment at the end of the period), unobservable inputs may be used. Unobservable inputs reflect Fund's management's assumptions about the factors market participants would use in pricing an investment, and would be based on the best information available in the circumstances.

The inputs or methodology used for valuing securities are not necessarily an indication of the risk associated with investing in those securities. The following is a summary of the inputs used to value CGM Focus Fund's investments as of June 30, 2010:

Classification	Valuation Inputs		
	Level 1 - Quoted Prices	Level 2 - Other Significant Observable Inputs	Level 3 - Significant Unobservable Inputs
Common Stocks*	\$2,640,667,174	\$ —	\$ —
Debt Securities			
Commercial Paper	—	30,030,000	—
Total	<u>\$2,640,667,174</u>	<u>\$ 30,030,000</u>	<u>\$ —</u>

* All common stocks held in the Fund are Level 1 securities. For a detailed break-out of common stocks by major industry classification, please refer to the Schedule of Investments.

B. Security transactions and related investment income — Security transactions are accounted for on the trade date (date the order to buy or sell is executed) and dividend income is recorded on the ex-dividend date net of applicable foreign taxes, a portion of which may be recoverable. The Fund will accrue such taxes and recoveries as applicable based upon its current interpretations of the tax rules and regulations that exist in the markets in which it invest. Interest income is recorded on the accrual basis and includes amortization of premium and discount. Net gain or loss on securities sold is determined on the identified cost basis. Non-cash dividend payments, if any, are recorded at the fair market value of the securities received.

C. Federal income taxes — It is the Fund's policy to comply with the requirements of the Internal Revenue Code applicable to regulated investment companies, and to distribute to its shareholders all of its taxable income and net realized capital gains, within the prescribed time period. Management has analyzed the Fund's tax positions for the open tax years (previous three years) ended December 31, 2009 and has concluded that no provisions for federal income tax is required in the Fund's financial statements.

CGM FOCUS FUND

NOTES TO FINANCIAL STATEMENTS (continued)

(unaudited)

Management's conclusion may be subject to review and adjustment at a later date based on factors including, but not limited to, ongoing analysis of tax laws, regulations and interpretations thereof.

At December 31, 2009, the Fund had available for tax purposes, capital loss carryovers of \$1,572,159,776 expiring December 31, 2017 and \$2,023,250,733 expiring December 31, 2016.

As of June 30, 2010, the components of distributable earnings on a tax basis were as follows:

<u>Undistributed Ordinary Income</u>	<u>Undistributed Long-Term Capital Gains</u>	<u>Net Unrealized Appreciation/ (Depreciation)</u>
\$ —	\$ —	\$131,523,046

The identified cost of investments in securities owned by the Fund for federal income tax purposes and their respective gross unrealized appreciation and depreciation at June 30, 2010 were as follows:

<u>Identified Cost</u>	<u>Gross Unrealized Appreciation</u>	<u>Gross Unrealized Depreciation</u>	<u>Net Unrealized Appreciation</u>
\$2,539,174,128	\$334,347,484	\$(202,824,438)	\$131,523,046

- D. Dividends and distributions to shareholders** — Dividends and distributions are recorded by the Fund on the ex-dividend date. The classification of income and capital gains distributions is determined in accordance with income tax regulations. Distributions from net investment income and short-term capital gains are treated as ordinary income for income tax purposes. Permanent book and tax differences relating to shareholder distributions may result in reclassifications to paid-in capital or accumulated realized gain/(loss). These differences are primarily related to dividends on short positions which were held less than forty-five days and foreign currency gains/(losses). The Fund also may utilize earnings and profits distributed to shareholders on redemption of shares as a part of the dividend deduction for income tax purposes. Undistributed net investment income or accumulated net investment loss may include temporary book and tax differences such as tax deferral of losses on wash sales, which will reverse in a subsequent period. Any taxable income or gain remaining at fiscal year end is distributed in the following year.

The tax character of distributions paid during the period ended December 31, 2009 and 2008 were as follows:

<u>Year</u>	<u>Ordinary Income</u>	<u>Long-Term Capital Gains</u>	<u>Total</u>
2009	\$ 3,786,109	\$ —	\$ 3,786,109
2008	\$33,932,273	\$ —	\$33,932,273

- E. Short sales** — The Fund may sell securities short. A short sale is a transaction in which the Fund sells a security it does not own in anticipation that the market price of that security will decline. When the Fund makes a short sale, it must borrow the security sold short to make delivery to the buyer. The Fund then is obligated to replace the security borrowed by purchasing the security at the market price at the time of the replacement. The Fund is liable for any dividends or interest paid on securities sold short. While the short sale is outstanding, the Fund is required to collateralize its obligations, which has the practical effect of limiting the extent to which the Fund may engage in short sales. Under certain market conditions, short

NOTES TO FINANCIAL STATEMENTS (continued)

(unaudited)

sales can increase the volatility of the Fund and may lower the Fund's return or result in losses, which potentially may be unlimited. As of June 30, 2010, there were no short sales.

- F. Indemnities** — In the normal course of business, the Fund may enter into contracts that provide indemnities to third parties for various potential losses and claims. The Fund's maximum exposure under these arrangements is unknown as this would depend on future claims that may be made against the Fund. The risk of material loss from such claims is considered remote.
- G. Foreign currency translation** — All assets and liabilities initially expressed in terms of foreign currencies are translated into U.S. dollars. Transactions affecting statement of operations accounts and net realized gain/(loss) on investments are translated at the rates prevailing at the dates of the transactions. The Fund does not isolate that portion of the results of operations resulting from changes in foreign exchange rates on investments from the fluctuations arising from changes in market prices of securities held. Such fluctuations are included with the net realized and unrealized gain or loss from investments. Reported net realized foreign exchange gains or losses arise from sales of foreign currency, currency gains or losses realized between the trade and settlement dates on securities transactions and the difference between the amounts of dividends, interest, and foreign withholding taxes recorded on the Fund's books and the U.S. dollar equivalent of the amounts actually received or paid. Net unrealized foreign exchange gains or losses arise from changes in the value of assets and liabilities other than investments in securities at the end of the period, resulting from changes in the exchange rate.
- 3. Risks and uncertainties**
- A. Non-diversification risk** — The Fund is non-diversified, meaning it may invest a significant portion of its investments within a single industry, sector of the economy or fewer individual holdings than a diversified fund. Therefore, the Fund may be subject to greater price volatility or be adversely affected by the performance of particular industries, sectors, or individual holdings compared to the performance of a diversified fund.
- B. Risks associated with foreign investments** — The Fund may invest in securities issued by institutions, corporations, and governments established by or located in foreign countries, which may be developed or undeveloped countries. Investing in foreign securities may involve significant risks. For example, there is generally less publicly available information about foreign companies, particularly those not subject to the disclosure and reporting requirements of the U.S. securities laws. Foreign issuers are generally not bound by uniform accounting, auditing, and financial reporting requirements and standards of practice comparable to those applicable to domestic issuers. Investments in foreign securities also involve the risk of possible adverse changes in investment or exchange control regulations, expropriation or confiscatory taxation, limitation on the removal of the Fund or other assets of the Fund, political or financial instability or diplomatic and other developments which could affect such investments. Foreign stock markets, while growing in volume and sophistication, are generally not as developed as those in the United States, and securities of some foreign issuers (particularly those located in developing countries) may be less liquid and more volatile than securities of comparable U.S. companies. In general, there is less overall governmental supervision and regulation of foreign securities markets, broker-dealers and issuers than in the United States. Additionally, because some foreign securities the Fund may acquire are purchased with

(unaudited)

and payable in foreign currencies, the value of these assets as measured in U.S. dollars may be affected favorably or unfavorably by changes in currency rates and exchange control regulations.

The Fund's Prospectus and Statement of Additional Information contain additional information on other risks and uncertainties relating to the Fund's investments.

4. Purchases and sales of securities — For the period ended June 30, 2010, purchases and sales of securities other than United States government obligations and short-term investments aggregated \$6,280,765,772 and \$6,706,893,006, respectively.

5. Fees and expenses

- A. Management fees** — During the period ended June 30, 2010, the Fund incurred management fees of \$15,488,741, paid or payable to the Fund's investment adviser, Capital Growth Management Limited Partnership ("CGM"), certain officers and employees of which are also officers and trustees of the Fund. The management agreement provides for a fee at the annual rate of 1.00% on the first \$500 million of the Fund's average daily net assets, 0.95% of the next \$500 million and 0.90% on amounts in excess of \$1 billion.
- B. Other expenses** — CGM performs certain administrative, accounting, compliance and other services for the Fund. The expenses of those services, which are paid to CGM by the Fund, include the following: (i) expenses for personnel performing bookkeeping, accounting and financial reporting functions and clerical functions relating to the Fund; (ii) expenses for services required in connection with the preparation of registration statements and prospectuses, shareholder reports and notices, proxy solicitation material furnished to shareholders of the Fund or regulatory authorities and reports and questionnaires for SEC compliance; (iii) registration, filing and other fees in connection with requirements of regulatory authorities; and (iv) compliance in connection to the Investment Company Act of 1940 and the Sarbanes Oxley Act of 2002. The accounting, administration and compliance expense of \$356,110, for the period ended June 30, 2010, is shown separately in the Statement of Operations. These expenses include the reimbursement of a portion of the compensation expenses incurred by CGM for its employees who provide these administrative, accounting, compliance, and other services to the Fund, including \$249,411 of the salaries of CGM employees who are officers of the Fund.
- C. Trustees fees and expenses** — The Fund does not pay any compensation directly to any trustees who are officers or employees of CGM, or any affiliate of CGM (other than registered investment companies). For the period ending December 31, 2010, each disinterested trustee will be compensated by the Trust with an annual fee of \$70,000 plus travel expenses for each meeting attended. The disinterested trustees are responsible for the audit committee functions of the Trust's Board and have designated a chairman to oversee those functions who receives an additional \$30,000 annually. Of these amounts, the Fund is responsible for \$10,000 per trustee annually, plus an annual variable fee calculated based on the proportion of the Fund's average net assets relative to the aggregate average net assets of the Trust.
- 6. Line of credit** — The Fund has a \$40,000,000 committed, secured line of credit with State Street Bank and Trust Company. Borrowings under the line will be charged interest at 1.25% over the higher of the Federal Funds Rate and the Overnight LIBOR Rate. The Fund incurred a commitment fee of 0.15% per annum on the unused portion of the line of credit, payable quarterly. There were no borrowings under the line of credit during the period ended June 30, 2010.

CGM FOCUS FUND

FUND EXPENSES

(unaudited)

As a shareholder of CGM Focus Fund, you incur two types of costs: (1) transaction costs, which could include, among other charges, wire fees and custodial maintenance fees for certain types of accounts and (2) ongoing costs, including management fees and other Fund expenses. This example is intended to help you understand your ongoing costs (in dollars) of investing in the Fund and to compare these costs with the ongoing costs of investing in other mutual funds.

The example is based on an investment of \$1,000 invested at the beginning of the period and held for the entire period January 1, 2010 to June 30, 2010.

Actual return and expenses

The first line of the table below provides information about actual account values and actual expenses. You may use the information in this line, together with the amount you invested, to estimate the expenses that you paid over the period. Simply divide your account value by \$1,000 (for example, an \$8,600 account value divided by \$1,000 = 8.6), then multiply the result by the number in the first line under the heading entitled "Expenses Paid During Period" to estimate the expenses you paid on your account during this period.

Hypothetical example for comparison purposes

The second line of the table below provides information about hypothetical account values and hypothetical expenses based on the Fund's actual expense ratio and an assumed rate of return of 5% per year before expenses, which is not the Fund's actual return. The hypothetical account values and expenses may not be used to estimate the actual ending account balance or expenses you paid for the period. You may use this information to compare the ongoing costs of investing in the Fund and other funds. To do so, compare this 5% hypothetical example with the 5% hypothetical examples that appear in the shareholder reports of the other funds.

Please note that the expenses shown in the table are meant to highlight your ongoing costs only and do not reflect any transactional costs such as any wire fees or custodial maintenance fees that may be payable. Therefore, the second line of the table is useful in comparing ongoing costs only, and will not help you determine the relative total costs of owning different funds. In addition, if these transactional costs were included, your costs would have been higher.

	<i>Beginning Account Value 1/01/10</i>	<i>Ending Account Value 6/30/10</i>	<i>Expenses Paid During Period* 1/01/10 – 6/30/10</i>
Actual	\$1,000.00	\$833.28	\$4.63
Hypothetical (5% return before expenses)	\$1,000.00	\$1,019.75	\$5.10

* Expenses are equal to the Fund's annualized expense ratio of 1.02%, multiplied by the average account value over the period multiplied by 181/365 (to reflect the one-half year period).

ADDITIONAL INFORMATION

(unaudited)

Availability of proxy voting information:

Proxy voting policies and information regarding how the Fund voted proxies relating to portfolio securities during the twelve month period ended June 30, 2010 are available without charge, upon request by calling 800-345-4048. The policies also appear in the Fund's Statement of Additional Information, which can be found on the CGM Funds website, www.cgmfund.com, and the SEC's website, <http://www.sec.gov>. The voting records can also be found on the SEC's website on the N-PX filing.

Portfolio holdings:

The Fund files its complete schedule of portfolio holdings with the SEC for the first and third quarters of each fiscal year on Form N-Q. The Fund's Forms N-Q are available on the SEC's website at <http://www.sec.gov> and may be reviewed and copied at the SEC's Public Reference Room in Washington, D.C. Information on the operation of the Public Reference Room may be obtained by calling 800-SEC-0330.

Advisory agreement approval:

In considering renewal of the advisory agreement, during meetings held in March and April 2010, the Board of Trustees of the Fund (the "Board") considered the following factors and came to the following conclusions:

1. The Board considered the nature, extent, quality and scope of the investment advisory and administrative services provided by CGM to the Fund. The Board agreed that the quality of the CGM professional team working on the Fund was very high, and was satisfied with the quality of CGM's advisory and administrative services.
2. The Board considered the investment performance of the Fund and CGM and reviewed information regarding the performance of the Fund as compared to market indices and a peer group of other capital appreciation funds selected and provided by Lipper, Inc., an independent provider of investment company data. Despite the comparatively poor performance for the one-year period ended December 31, 2009, the Board noted the strong performance of the Fund for the three-year, five-year and ten-year periods ended December 31, 2009 and that for such time periods the Fund (a) exceeded the median performance for the other mutual funds included in the Lipper reports, and (b) outperformed the S&P 500 Index. The Board agreed that this performance reflected in large measure the focus of CGM on long-term performance in managing the Fund's assets, including taking advantage of strategic trends in the economy that might take some time to develop. The Board acknowledged that, while for some periods this focus on long-term performance might cause the Fund to lag other comparable mutual funds with a more short-term focus, over the longer term CGM's approach had proven its worth.
3. The Board discussed the costs of the services provided and profits realized by CGM from the relationship with the mutual funds advised by CGM and each of the separate accounts managed by CGM. The Board also compared the profit margins of CGM with public information on the profit margins of some publicly held investment advisory firms. The Board found that CGM's profit margins were reasonable and not excessive.

CGM FOCUS FUND

ADDITIONAL INFORMATION (continued)

(unaudited)

4. The Board discussed with CGM whether economies of scale might be realized with growth in the Fund. The Board considered the Fund's ability to sell securities short and the increased efforts on the part of CGM required to carry out these activities as Fund assets increase. Given the Fund's investment style and performance, as well as the fact that the Fund experienced net redemptions in 2009, the Board determined that it would not be advisable at this time to seek to make adjustments to the break point structure of the advisory fees paid by the Fund.

5. The Board received and considered information comparing the advisory fees paid by the Fund and the overall expenses borne by the Fund with those of funds in the relevant expense universe as selected and provided by Lipper, Inc. The Board noted that the overall expense ratio of the Fund was below the median overall expense ratios of other mutual funds included in the Lipper reports. The Board considered that the advisory fee paid by the Fund was above the median for its Lipper peer group, but concluded that the fee was reasonable in light of CGM's active investment style and the performance of the Fund. The Board also reviewed information regarding fees charged by CGM to its other clients, including its separate account clients. The Board noted that CGM reviewed with the Board the significant differences in scope of services provided to the Fund and to several other clients, noting that the Fund required a greater allocation of management's time as a result of its differing investment mandate and the fact that it is a publicly offered investment vehicle. The Board discussed the fee comparisons in light of the differences required to manage these different types of accounts. Based on these comparisons, the Board concluded that the advisory fees paid by the Fund and the overall expenses borne by the Fund were reasonable and competitive.

In addition to the foregoing, in light of the fact that CGM could potentially benefit from soft dollar arrangements of the Fund, the Board of Trustees reviewed the brokerage commissions of the Fund and concluded that the brokerage commissions were reasonable, particularly given the CGM's focus on best execution.
